

Potato Chip Mailing Contest

Eric, Ara, Sumin, David

Objective/Requirements

- Build a container to ship a potato chip that smells nasty.

Design

Predicted Score with Explanation

- 100 because we think that the cotton will keep the chip constantly in place, and with the proper amount of care, we will be able to get a full score

Parts List

- We need cotton maybe 1 bag and half of a Pringles canister.
- We are going to add cotton to the top and bottom of the container and then place it in the box that will ship

Photo of Mailed Container

Data

- Official Score: .0097

(disclaimer: we didn't see the formula)

Lessons Learned

- We got the chip to stay 100% in tact
- I would make a smaller box
- We didn't see the formula
